

10 essential criteria for a sustainable mini-van conversion kit

Strong but light wood

Total of 56 kg for the complete kit, the 5 modules

Moisture resistance

Marine grade poplar wood used for sailboat furniture

Superior quality and ecological varnish

Varnish without any emanation of volatile organic compounds (0 VOC)

Non-toxic glue

Eco-responsible manufacturing certified FSC, PEFC and CARB Phase 2

Multi-layer protection of all cutting edges

The wood is varnished as much on its surfaces as on its slices of cuts (its edges)

The ventilation of wood and mattress

Ventilation hatches on the top of the modules

Avoid mechanical parts

Avoid the use of hinges, screws for the assemblies of the boxes

Use premium hardware to withstand the vibrations of the road

The ease of use and multi-access of an ingenious design

Access to storage in two ways (from above, through drawers or fronts). Easy access to the vehicle floor storage space.

Queen-size bed, high-density mattress

80 " bed

High density foam (HR30 kg / m³)

Visual clearance at the rear

To better contemplate the magnificent landscapes of nature

Transportability

Lightweight module

Weight of each RoadLoft module: 22.12.9.7.6 kg
